

Install & Use the Paraloom Plugin

Claude Desktop · ~5 minutes

INSTALL

- 1 Open Claude Desktop **Settings**
- 2 Go to **Plugins**
- 3 **Add** → **Upload plugin**
- 4 Drop in **paraloom-plugin.zip** → **Upload**
- 5 **Connectors** **tab** → **Install** **by Paraloom**
- 6 Click **Connect**
- 7 Sign in to Paraloom → shows **Connected**

FINISH SETUP

Open a new chat, paste this, and approve the steps:

```
Run /project-setup to confirm Python 3 and Playwright are installed. Then save my DataForSEO
credentials: if ~/.dataforseo.env doesn't already exist, create it with
DATAFORSEO_LOGIN=your-login and DATAFORSEO_PASSWORD=your-password – don't print the values
back.
```

USING THE PLUGIN — TRY THESE

KICK OFF AN EXPERIMENT

```
Run an experiment for [credit union] on [topic].
```

SEND IT TO THE CUSTOMER

```
Send the [experiment] deliverable to the client.
```

CHECK FOR REVISIONS

```
Check [experiment] for client responses and apply any revisions.
```
